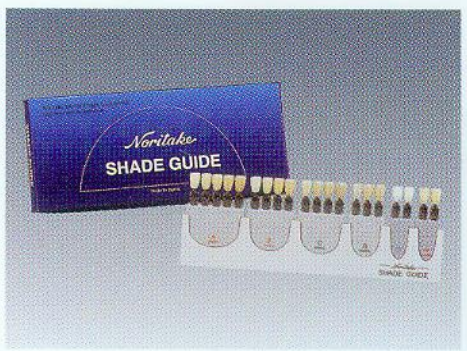
NORITAKE SHADE GUIDE



The Noritake Shade Guide has been specifically designed to match precisely with Noritake Porcelains. It will make shade taking from natural teeth very easy.

Basic Concept of Shades

Noritake Porcelain incorporates less of a greenish color and shifts toward more of a pinkish color. This new system promotes better reproduction of the vivid shades of natural teeth. Noritake shade Guide was developed utilizing this concept. Please note that stains have not been used in the fabrication of the Shade Guides to facilitate the correct selection of shades.

Noritake Original Shades

NP1.5 ····· The chroma is between A1 and A2 shades - the hue corresponds to the slightly reddish shades.
NP2.5 ····· The chroma is between A2 and A3 shades - the hue corresponds to the slightly reddish shades.
NW0, NW0.5 ···· These two shades are useful for the cases where whiter teeth are required due to the patient's request or to match adjacent bleached teeth.

NORITAKE ESTHETIC WHITE SHADE GUIDE

ESTHETIC WHITE SAHDE GUIDE is a shade guide for new bleaching shades of CZR and CZR PRESS. It is to create whiter shades rather than NW shades.

EW00 ···· Ultimate white shade with highest opacity
EW0 ····· Whiter and higher opacity than NW0
EW ····· Whiter than NW0 but the same opacity
EYW ····· Slightly yellow white shade with the same opacity as NW0

NEW COLOR GUIDE

NORITAKE NEW COLOR GUIDE is new and unique color guide for all Noritake porcelains (except Ti-22). The shape is designed with original crescent shape. This color guide makes ceramist work very easy and getting correct shade image for ceramists can crate beautiful porcelain work with Noritake porcelains.
